Warm Water

How to Use

With Temperature Play

- Glass responds beautifully to temperature, offering a unique way to awaken your senses.
- For Warmth: Place your wand in a bowl of warm water for a few minutes. Make sure the water is not too hot—lukewarm to body-temperature is ideal.
- For Cool Sensation: Let the wand rest in cool or icy water (not ice itself) until it reaches your preferred chill.
- Always test the temperature on your inner wrist before using on intimate areas.

Cleaning and Care

- Use a toy cleaner/mild soap with water to clean the product before and after each use.
- Pat with a towel and allow it to air-dry completely.
- This toy is non-porous and body-safe—perfect for long-term use with proper care.

Warning

- Always check the surface before use—glass should be completely smooth, without cracks or chips.
- Avoid sudden temperature extremes (e.g., from hot to ice-cold water).
- Do not use if damaged or dropped on a hard surface.
- This toy is not designed for impact or rough thrusting.
- Discontinue use if feeling pain or discomfort.
- Adult novelty only. Use for medical purpose or for a use that has an adverse effect on any function of the body is prohibited.
